PROFESSIONAL SUMMARY

Final-year Software Engineering student with hands-on experience in full-stack web development, AI-powered systems, automation workflows, and RESTful API integration. Skilled in building scalable MERN stack and Python-based applications with strong problem-solving abilities and adaptability to fast-paced remote environments. Experienced in developing AI-driven platforms, real-time systems, and mobile applications. Passionate about integrating AI technologies into practical software solutions and continuously learning emerging technologies. I am currently exploring LangChain and LLM-based application development.

TECHNICAL SKILLS

- **Full-Stack Development:** HTML5, CSS3, JavaScript (ES6+), React.js, React Native (Expo), Node.js, Express.js, Basic TypeScript, RESTful APIs
- **Backend & Databases:** Python, MongoDB, SQL (Basic), Firebase
- **AI & Machine Learning:** Machine Learning, NLP, Chatbots, Recommendation Systems, TensorFlow (Basic), Scikit-learn (Basic)
- **Web Scraping & Automation:** Selenium (Basic), Web Automation, API Data Extraction
- **Testing & Tools:** Manual Testing, Functional Testing, Regression Testing, Smoke Testing, API Testing, Git & GitHub, Postman
- **Concepts:** Agile Development, Real-Time Systems, Problem Solving, Cloud Fundamentals (GCP Basics)

PROJECTS

SkillNest - AI-Based Skill Marketplace

- Designed and developed an **AI-driven platform** connecting mentors and learners.
- Implemented a **recommendation system** to enhance mentor matching.

MNIST Digit Classifier

- Built CNN model achieving **~98% accuracy** on handwritten digit classification.
- Deployed using Flask API enabling **real-time predictions**.

Auto Avenue - Mobile App

- Developed React Native app with role-based authentication.
- Improved user experience and performance.

EDUCATION

BS Software Engineering (2022–2026)

University of Central Punjab

CGPA: 3.31 / 4.00

CERTIFICATIONS

- Google AI Essentials (2025)
- IBM AI Fundamentals (2025)
- Meta JavaScript Programming (2025)
